

Angel Investors Club

Whitepaper

November, 2024

Introduction

Blockchain technology continues to lead transformative changes by rapidly integrating into every aspect of our lives. It offers innovative solutions across a wide range of areas, from data storage and transfer to financial transactions, security systems, and smart contracts. Additionally, it has proven its impact in fields such as supply chain management, digital identity verification, secure storage of medical records, and patent processes. Thanks to its decentralized structure, blockchain ensures transparency, reliability, and speed in transactions while significantly reducing costs. It stands out as a technology that not only shapes the present but also paves the way for the future.

With the regulatory frameworks introduced by governments worldwide, cryptocurrencies have gained global recognition. This has strengthened the belief among users that cryptocurrencies could replace centralized currencies in the future. Some businesses have already started accepting cryptocurrency payments for their services, and this trend is expected to become more widespread soon.

Figure 1 Decentralized Structure of Blockchain

Decentralized Nature

The system operates without reliance on a single entity, as control is distributed across multiple participants. If one node becomes compromised, the network is designed to self-repair.

The decentralized nature of blockchain allows two unknown parties to interact directly, enabling the exchange of data or finances through peer-to-peer transactions

Our Vision

The Angel Investors Club serves as a platform that connects innovative blockchain entrepreneurs struggling to secure funding with investors eager to explore opportunities in blockchain field. Beyond simply matching investors and entrepreneurs, our club is dedicated to building a comprehensive support ecosystem to help entrepreneurs bring their projects to life.

Figure 2 Early structural idea of the Angel Investors Club

This ecosystem includes Angel LABS, which offers essential technical infrastructure for idea-stage projects, support for building professional teams, marketing strategies, and promotional campaigns led by influential figures in the blockchain industry to drive community growth.

It also features a Launchpad platform to support seed-stage projects. Angel Investors Club is a space where entrepreneurs and investors can connect and collaborate for mutual benefit.

ECOSYSTEM

Angel LABS

Angel LABS provides technical and financial support to early-stage projects by forming project teams, supplying necessary equipment, and offering budget assistance. Additionally, we develop the consultancy services and effective marketing strategies needed to ensure the success of these projects.

The mission of Angel LABS is to contribute to the development of ventures that will shape the future of the Web3 sector by providing funding, technical support, mentorship, and access to a wide network for early-stage projects.

Angel Investors Club Platform

The Angel Investors Club was established to help entrepreneurs developing projects secure funding from angel investors at early stages and to present projects to angel investors who are interested in making investments.

Memberships to the club will be obtained through the official website. Developers and angel investors who become members must connect their wallets and make a payment by purchasing Angel X tokens equivalent to \$10 (The team reserves the right to change the membership fees at a later date).

Entrepreneurs who gain access to the platform can purchase the right to upload a project to the system by making the specified Angel X Token payment. Angel Investors can also reach the developers of the projects they are interested in and the related details by paying a fee on the platform. To access the platform, subscription renewals are required. Users who do not make subscription payments will not be able to access the platform.

Angel DAO

Angel DAO is a launchpad platform that helps entrepreneurs fund and grow their projects at early stages. By building a global audience, it gives users early access to high-potential projects. In addition, it offers services like token distribution, community building, marketing strategies, and enhancing your project's visibility. Developers can upload their projects to the Angel DAO platform to secure funding and grow with the support of a large community. Investors, in turn, can invest in projects within a secure environment and earn profits. Angel DAO is committed to shaping the future of blockchain-based projects by creating a strong community and supporting your projects with effective strategies.

About Angel X Token

Name

Angel X – Angel Investors Club Token

Blockchain Protocol

Binance Smart Chain

Standard

BSC

Total supply

1,000,000,000 Angel X (1Billion)

Distribution Mechanism

- Seed Sale (20% of total supply)
- Public Sale (10% of total supply)

Vesting Schedule

Seed Sales – one-year-locked then will be unlocked %10 linearly for 10 months

Public Sales – six-months-locked then will be unlocked %10 linearly for 10 months

Team – one-year-locked then will be unlocked %10 linearly for 10 months

Angel X Token is the cornerstone of the Angel Investors Club ecosystem.

Angel X Use Cases

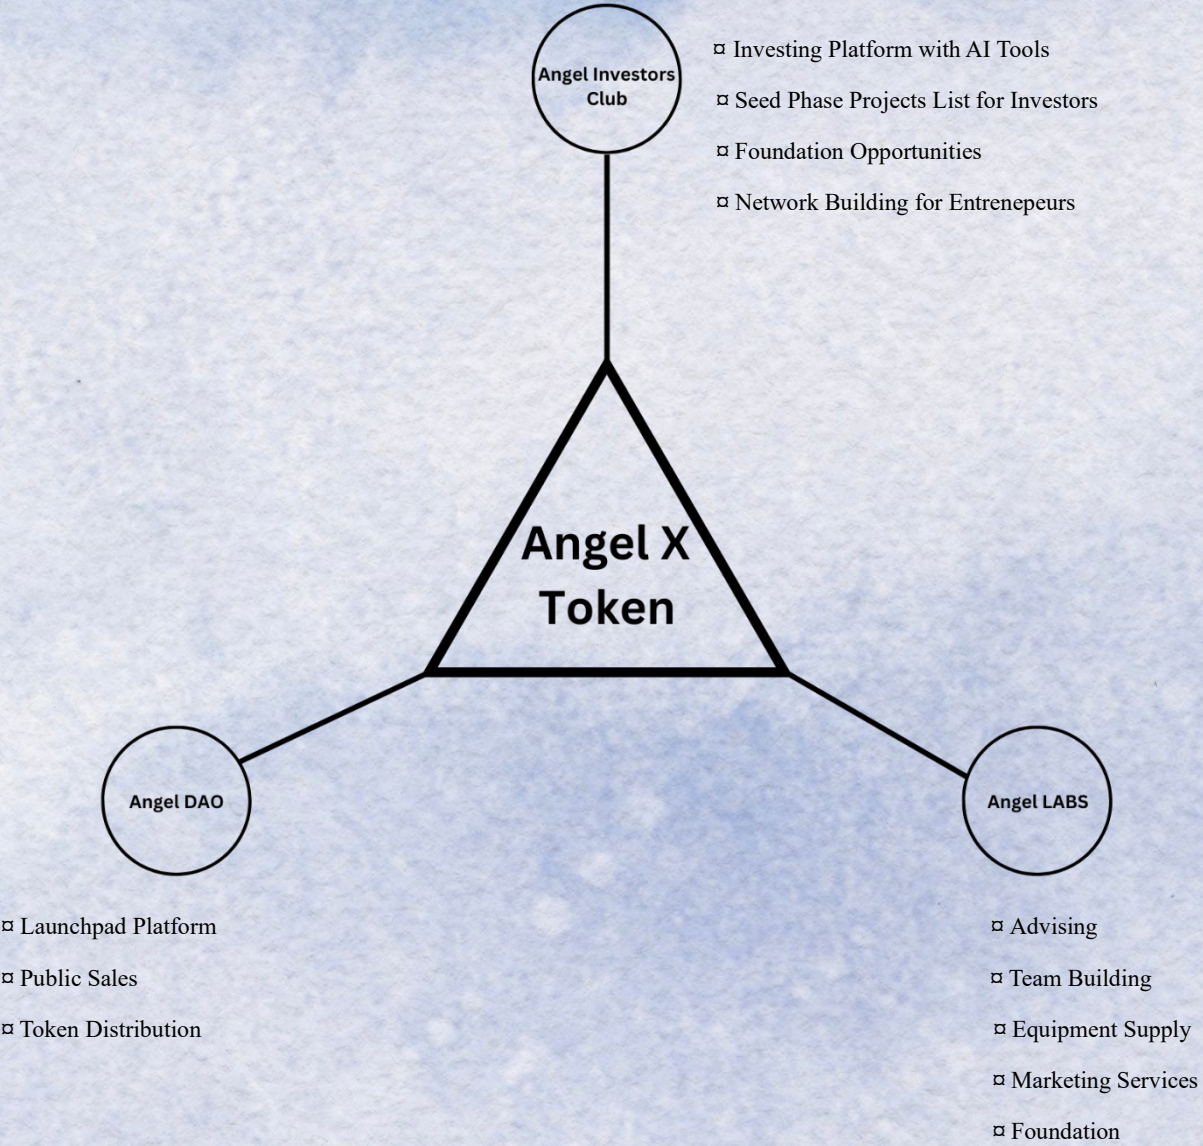

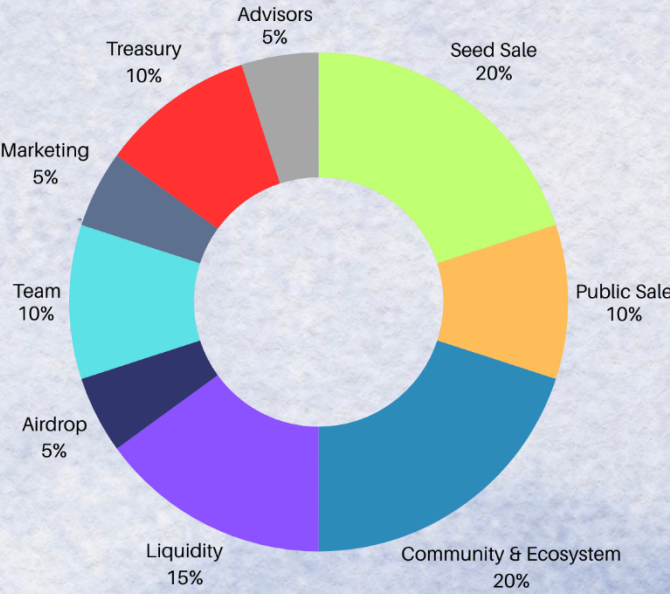

Figure 3 The use cases of Angel X Tokens

The above is for illustrative purposes. We make no representation or warranty on Angel X being distributed to users of these potential services and products. The availability of these utilities is subject to our future official announcements

Angel X Token Allocation

Tokenomics refers to the economic model of a cryptocurrency, encompassing factors such as supply, distribution, use cases, and elements that influence its value. The team has set the maximum supply of the Angel X token at 1 billion. This supply cannot be increased but can be reduced through burning processes.

Seed Sale (20%) is a special funding round where tokens are sold at discounted prices to a group of investors before the public sale

Public Sale (10%) The public round

Liquidity (15%) The amount of Angel X coins will be circulated

Community & Ecosystem (20%) The number of tokens for the establishment of staking platforms, offering special opportunities, making community investments, and creating an ecosystem for future projects.

Graph 1 The chart illustrates how the 1 billion Angel X tokens are distributed

The parts of the tokenomics including seed sale, public sale, team, advisors, totally 45% of total supply will be locked.

55% of supply will be circulated

Graph 2 The chart illustrates the percentage of locked and unlocked Angel X Tokens

Phase 5	2025 Q4	Innovation and Growth <ul style="list-style-type: none">☐ Platform Expansion☐ AI-Powered Investment Insights

Burning

"Burning" is the process of reducing a token's supply by permanently removing it from circulation or, in some cases, eliminating it from the blockchain entirely.

Angel Investors Club employs a burning mechanism to safeguard the intrinsic value of Angel X Token. This process will be conducted by means of subscription incomes. Tokens that came from Angel Investors Club, Angel Launchpad and Angel LAB's subscribers, will be burned by the project team.
